- 20 days over 90 miles in 3 years
- ~7 days per year
- most of those were due to 2-3 big roadtrips per year, when car rental/swap could work
- charging for a few hours would cover ~~most~~ most of the long days (at 6.6 kWh)
- gas was burned on ~120 days out of 1095, and only 26 were > 1 gallon
